

Waldegrave School's Healthier Route Map

Transport is a large emitter of greenhouse gases and a leading cause of air pollution across London Borough of Richmond. Making small changes to the way we travel to school, and around our local area can make a huge difference.

Try and plan your journeys following part of these routes on the map below. Some of Waldegrave's Year 8 and 9s have selected these routes based on their experiences and analysis of the local area according to Healthy Streets Indicators, like clean air and access to green space.

Access the online map [here](#) or scan this QR code!
